

Recap Day 1

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

1000 mothers die every day

What is most common cause in the world?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Haemorrhage

Muimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

How can we stop mothers dying?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

A B C D E!

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Why should we use ABCDE?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- We need a system when stressed
- Easy to remember
- Treats most urgent things first

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

A?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Airway

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

B?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Breathing

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

C?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Circulation

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

D?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Disability (Conscious level)

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

E?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Everything Else

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

What are the first things to do?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Call for Help
- Then ASSESS & TREAT

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- How do you assess Airway?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- LOOK LISTEN FEEL
- Feel breaths
- Look in mouth/ at chest
- Listen breathing
- Snoring? Gurgling?

How do you treat Airway problem?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Chin Lift
- Jaw Thrust
- Oro-pharyngeal airway
- Lateral position (not lying flat on back)
- Suction
- Intubation

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- How do you assess Breathing?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Count breathing rate
 - Normal <20. Critical >30/min
- Listen lungs
- Pulse oximetry
- Cyanosis

- How to treat Breathing Problem?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- OXYGEN
- Nasal Prongs 2-4L
- Mask >5L
- Bag & Mask
- Intubate & Ventilate

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

How do you assess circulation?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Pulse <100

Capillary refill time (>2secs)

Blood pressure >100

Conscious level

urine output

skin colour, feel

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

How do you treat shock?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

IV cannula - big

IV fluid FAST!!!

R Lactate/N Saline/Blood
500ml or 1000ml

REASSESS and REPEAT!!!

Stop bleeding

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Disability (Conscious Level)

How to assess conscious level?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

AVPU

What does it stand for?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Alert
Voice
Pain
Unconscious

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

How to treat reduced conscious level?

Muimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Clear airway!

Treat underlying cause (haemorrhage?)

Glucose?

Eclampsia?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- E – Everything else
- History, examination, investigations
- Diagnosis

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Physiological changes in pregnancy

- A – more difficult intubation – why?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Swollen mucous membranes
 - More difficult Mallampati
 - Big breasts
-
- Be aware! Pre-oxygenate!

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Increased risk for aspiration – why?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Delayed gastric emptying if in labour, or given opioids
- Decreased lower oesophageal sphincter tone
- RSI!

- B – Quicker desaturation – 1 minute! – why?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- High Oxygen demand – esp in labour
- Lower FRC
- Pre-oxygenate!

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Vena Cava Syndrome

- Wedge! The Mulungu Tilt!

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Spinal Anaesthesia

- Safer than GA
- What are contraindications?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Patient refusal
- Hypovolaemia

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Which local anaesthetic best?

Muimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Bupivacaine

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- What are important preparations before a spinal?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Large IV cannula
- IV fluid
- Ephedrine in the theatre
- Full equipment to do GA
- Wedge
- Monitoring (BP, HR, saturation)

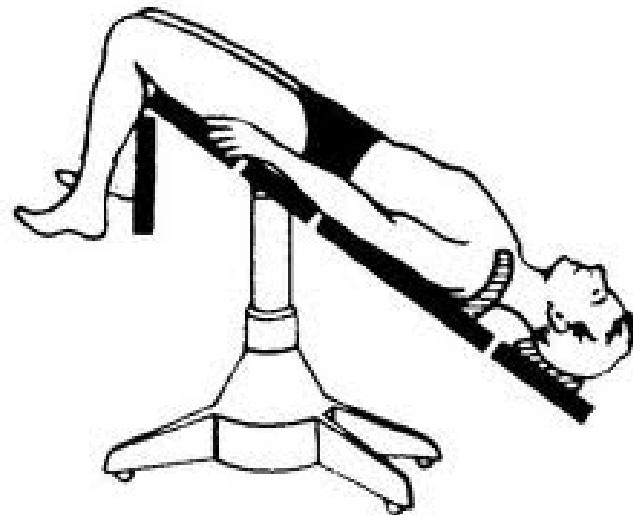

- How to treat hypotension in spinal?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

NO!

Muimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

YES!

Give fluids

Ephedrine

Course in Obstetric
Anaesthesia 2012

Spinal Anaesthesia

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

GA

- What does RSI stand for?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- **R**apid
- **S**equence
- **I**nduction

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- When should we do RSI in obstetric anaesthesia?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Always?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- How do you do an RSI?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

1. Suctioning ready for use
2. Position head
3. Preox 3 min
4. Thiopenthal 4-7 mg/kg
5. Succinylcoline
6. No ventilation
7. Intubate
8. Ventilate and listen

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- What should you do if you fail to intubate?

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

- Ventilate!

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Algorithm Failed intubation

Mask ventilation adequate

No fetal distress

Wake up

Alternative anesthesia

Mask ventilation inadequate

LMA
Surgical airway

Continue

- Be prepared for blood transfusion early!
- Normal bleeding <500ml
- Wedge Wedge Wedge!

- Teamwork
- Communication between surgeons and anaesthetists v important

Muhimbili Karolinska
Anaesthesia & Intensive Care Collaboration
www.mkaic.org • info@mkaic.org

Timetable Wednesday

- 9.00 Recap
- 9.30 Preparing for obstetric anaesthesia
- 10:00 Scenarios
- 10.30 Coffee
- 11.00 Neonatal resuscitation
- 11.45 Scenarios
- 12.30 Recognising the critically ill mother
- 13:30 Lunch
- 14:15 Bleeding, aortal compression
- 15:00 Seminars
- 16.00: End
